Nowadays the English language is surrounding of our life. This language is developing so fast that everybody is learning English with interest. Not only English is important for the young but also the old. For this reason every learners needs a good teacher. In order to learn English very well, some students should choose a skillful teacher. Because it depends on teachers teaching and their methods. As a result, modern technologies play a very essential role in English teaching. These are: innovative technology, multimedia technology Radio TV, CD Rom, Computers, the Internet, Electronic Dictionary, Email, Blogs and Audio Cassettes, Power Point, Videos, DVD's or VCD's. For instance: Using multimedia to create a context to teach English has its unique advantages.

This article tries to analyze the necessity of modern technologies to English language and will help new teachers how to teach the English language to the learners. Moreover, it also accomplishes to make English teachers aware of the strategies to use it in an useful teaching and different methods. In language teaching and learning, we have a lot to choose from the world of technology.

At the beginning of the 21st century the range of technologies in language learning and teaching has become very different and because of the ways they are being used at universities, colleges and schools. So, they have become central to language practice. These digital equipment is, certainly, central in what we would argue is the established and recognized field of computer assisted language learning , but we are also improving a center part of English language teaching in general.[1**.Arny Macia, E (2012) The Role of Technology in Teaching Languages for. p: 89–104.]]**

At this time people have difficulty in learning foreign languages. All people are allowed to choose their level of difficulty in grammar and vocabulary quizzes, and even crossword puzzles. Furthermore, the site offers a range of important information, some questions, funny games and other activities. You Tube is one of the best sites in the world, which is very necessary for new foreign language learners. You Tube videos, including those that permit learners to listen and read a lot besides, this site submit important information which is very valuable for English learners. Various videos help to expose students to the use of natural languages. These videos and other useful technologies motivate students to learn foreign languages. For the time being young children and pupils like watching short cartoons and animated

movies. Then their interests to foreign languages will improve. In addition, older students are able to learn about latest news events through news broadcasts. To tell the truth mass- media is really is very helpful who wants to learn any languages.

Interesting movies and short videos have free resources that include vocabulary worksheets and discussion questions to improve their weak sides. Moreover, the sites also help a film survey to assess students' interests before a choosing films, and film reviews that can be adapted for any level of instruction. As we know, some students' vocabulary is not very good. So using from dictionary is very important. Nevertheless, when they are going to find any word quickly, it is quite uncomfortable. In that case using from technology is very comfortable. The benefits of using technology are unlimited. If anyone wants to use these innovative technologies they may use any time. All technologies give a lot of opportunities to learn foreign language. Usually, it depends on us to seek out the high teaching resources which are the best benefit each of our classrooms.

The developed era gives new challenges and duties on the modern teachers. The tradition of English teaching has been dramatically changed with the remarkable entry of technology. Modern Technologies provided with so many options as making teaching interesting and it makes teaching more productive in terms of improvements. The role of modern technology in teaching the English language is one of the most significant drivers of both social and linguistic change. [1]**[1] [44-55 pages]**

He mentioned that modern technologies are very important and essential aspects for both teaching and learning. All technologies are the regarded as a key of golden method in English. The use of English language has increased rapidly after 1960. For the time being the role and the importance of English is that it is the language of social context, political, sociocultural, business, education, industries, media, library, communication across borders, and key subject in curriculum and language of imparting education. Every technology is used for improving students' motivation; it satisfies both visual and auditory senses of the students. With the spread and development of English around the world, speakers and new learners have learned the English language.**[2[2]] [45-51pages]**

According to David Graddol's opinion 'it is the language at the leading edge of scientific and technological development, new thinking in economies. One of the popular methods is digital tools. Digital tools including a wide range of media forms: images, video and audio clips and Web pages. The majority of studies they found deal with reading Comprehension and understanding. Of one of the scientific English Graddol (2000) mentioned that in the year 2000 there were about a billion English learners- but a decade later the numbers doubled. The same study shows that over 80% of information stored on the internet is in English. Today With the rapid development of science and technology, the using and developing of multimedia technology and its application to teaching, featuring audio, visual, animation effects comes into full play in English class teaching and sets a suitable platform for reform and exploration on English teaching model in the new era. It's fact that multimedia technology plays a positive role in promoting activities and initiatives of student and teaching effect in English class**[3][3]*[123-133]***

Modern Technologies give us value for money and time.We don't spend much time to learn something when we use modern technologies. So, they are still important to make sure that the technologies that we have available are used effectively. They can open doors of chance for all of us.**[2.Arny Macia, E, Soler Cervera, A and Rueda Ramos, C (eds) (2006)]**

The usage of modern technologies in learning English language does not seem to be restricted to any special age group.It gives the range of chapters offered in good style and the case studies presented here suggest which practitioners are using innovative technologies a lot. In many cases learners are offered the

range of technologies which is very appropriate for any age group. The range includes different technical aids. They are: electron books, different videos, interesting tests, and cartoons with subtitle. In addition modern Technological innovations have gone hand –in hand with the growth of English and are changing the way in which we communicate. As a result in modern technologies all learners are learning English without difficulty. If we neglect or ignore technological developments, they will continue and perhaps we will never be able to catch up, understand the branch of foreign languages. For this reason it is important for language teachers to be aware of teaching methods and essential technologies.

Today's life is related to modern and innovative technologies. There are many chances in teaching English. We come across them every step of our life. Using modern technologies gives us endless environment useful methods to teachers for teaching learners and many advantages. Furthermore, using various types of modern technologies can make learners study with interests.

In other words, we can say that innovative, multimedia and other vital methods and up-to-date technologies are good for teachers to teach foreign languages particularly the English language. Moreover, the common usage of modern technologies is a way to create new steps to the future life.
